

It's as easy as

1, 2, 3.

1.

R&B Sten-Tel clients record dictations or meetings over standard phone lines or via a portable digital device, which is recorded on our digital dictation system.

2.

Transcriptionists listen to dictations and type reports using the latest technology in audio comprehension and keyboard efficiency.

3.

Completed reports are downloaded via our secure, HIPAA compliant website or are dropped into any EMR system via custom-built interface.
