TITLE OF REPORT (e.g. AORTIC ANEURYSM SCREENING)

Patient Name: John Doe

Age: 45

Date of Birth: August 28, 1958

Patient ID: 123456

Location: Chicago

Gender: Male

Dictating Physician: Frank Smith, M.D.

Test Date: January 21, 2003

I had the opportunity to see your patient John Doe for consultation on January 21, 2003 for his Aortic Aneurysm Screening.

Indications:

Men age 65 or older.

Women age 65 or older with cardiovascular disease.

Family history of aortic and peripheral vascular disease.

Examination Protocol:

Transverse images of proximal (near diaphragm) and distal aorta.

Longitudinal images with AP measurements (optional).

Aorta Measurements:

Proximal: 2.1 cm

Mid: 2.7 cm

Distal: 2.9 cm

Interpretation: Abdominal aortic ultrasound was performed with attention to the distal aorta.

There is very small dilatation of the distal aortic artery. These findings are borderline for aortic dilatation.

Recommendations: Clinical correlation and repeat examination with sonography in 12 months.

This paragraph is a fixed paragraph that a client can request at the end of every report.

DD: January 25, 2003

DT: January 26, 2003

TID: 1245342

Frank Smith, M.D.

Professor of Cardiology

MT FEES:

✓ Standard lines: 22 lines x 15¢/line — \$3.30

Total Cost

\$3.30

Net Cost Savings

Cost without MedXscribe \$3.30

Cost with MedXscribe: \$1.65

(PLEASE SEE REVERSE FOR SAMPLE)

\$1.65 difference!

50% reduction!

I had the opportunity to see your patient John Doe for consultation on January 21, 2003 for his Aortic Aneurysm Screening.

Indications:

Men age 65 or older.

Women age 65 or older with cardiovascular risk factors.

Family history of aortic and peripheral vascular aneurysmal disease.

Examination Protocol:

Transverse images of proximal (near diaphragm) and distal aorta.

Longitudinal images with AP measurements (proximal, mid, and distal).

Aorta Measurements:

Proximal: 2.1 cm

Mid: 2.7 cm

Distal: 2.9 cm

Interpretation:

Abdominal aortic ultrasound was performed. There is very small dilatation of the distal aortic aorta. No other significant findings.

Recommendations:

Clinical correlation and repeat examination with sonograms in 12 months.
